

FOR IMMEDIATE RELEASE

ONVIF Expands Influence with 5,000 Conformant Products, 500 Members and 5th Profile

SAN RAMON, CALIFORNIA. – Sept. 21, 2015. [ONVIF](#), the leading global standardization initiative for IP-based physical security products, is announcing that it has reached nearly 5,000 IP-based physical security products registered as ONVIF compliant, grown to more than 500 member companies, and has developed its fifth profile specification - Profile A for advanced access control, to the industry for feedback.

These milestones signify ONVIF's continuing development and influence as a major driver of interoperability in the physical security market. "End users in the industry and the broader consumer market now expect basic interoperability when they make purchases, and manufacturers are responding by making more interoperable products by using ONVIF's specifications," said Per Björkdahl, Chairman of the ONVIF Steering Committee. "We are proud to have reached these milestones in ONVIF's growth and development and look forward to working with our members and the industry at large to continue to promote interoperability in the market."

5,000 Conformant Products and 500 Members

In the last 12 months alone, the number of ONVIF conformant products increased by 1,300, an increase of approximately 35 percent increase. Also in the past year, ONVIF reached more than 500 members, a membership that represents six of the seven continents in the world.

5th Profile – Profile A

ONVIF's fifth and newest profile - Profile A for advanced access control, is designed to establish an interface for access control clients and expands the configuration options for ONVIF conformant access control systems. Profile A is available in release candidate status on the ONVIF website.

"ONVIF's latest release of the Profile A Release Candidate was designed to meet the market's evolving need for a more advanced access control profile," said Neelendra Bhandari, Engineering Leader at ONVIF member company, Honeywell Security. "This

illustrates ONVIF's commitment to stay attuned to the needs of its members and the industry which is reflected in its ongoing development of new profiles and continued work to promote interoperability."

With Profile S for streaming video, Profile G for recording and storage, Profile C for physical access control, Profile Q for easy installation and advanced security features and Profile A for advanced access control configuration, ONVIF continues to work with its members to expand the number of IP interoperability solutions ONVIF conformant products can provide.

Further information about ONVIF's conformant products, including the vendors and the conformant models, is available on ONVIF's website: www.onvif.org.

About ONVIF

ONVIF is a global and open industry forum that is committed to standardizing communication between IP-based physical security products to ensure their interoperability and to facilitate their integration. ONVIF was established in 2008 to develop a global open standard for IP-based physical security products. Membership is open to manufacturers, software developers, consultants, system integrators, end-users and other interest groups that wish to participate in the activities of ONVIF.
